

## Cisco Building 7 Data Center

San Jose, CA

Owner	Cisco
Completion	2010
Project Description:	This is a 140,000 ft <sup>2</sup> office/data center. It was originally built in 1995. The project consisted of a series of energy efficiency retrofits including a new waterside economizer, VFDs on CRAH units, and controls optimization.
Contractors	Air Systems, Inc.
Taylor Engineering's Role:	Energy and lifecycle cost analysis of retrofit options. Detailed design/build performance specifications. Construction administration. Commissioning. Measurement and verification of actual energy savings. PG&E incentive calculations and documentation.
