

Napa Data Center

Owner	Major healthcare provider
Architect	Hawley Peterson & Snyder
Completion	2012
Project Description:	Main data center for medical and corporate records. This is a Tier III+ data center with 100% uptime for three years running. The project includes a major upgrade including a new central plant, waterside economizer, and thermal energy storage system, all installed and commissioned on a live facility. The facility has 100,000 ft ² of raised floor to support 9.6 MW of IT load at full buildout.
Contractors	DPR (General), ACCO (HVAC)
Taylor Engineering's Role:	Engineer of record for the HVAC, plumbing and control systems.
