

## Oracle Pleasanton Building 2

Pleasanton, CA

Owner / Developer	Oracle Corp. / Rockridge Group
Completion	2009
Project Description:	New 180,000 ft <sup>2</sup> office building including data center, computer labs, fitness center and cafeteria. HVAC design includes built up VAV chilled water air handlers serving VAV reheat boxes. Computer labs are served by CHW fan coils and VAV boxes for redundancy and economizer free cooling. The chiller plant includes high efficiency, water-cooled variable speed screw chillers which were selected in a pre-bid lifecycle cost analysis. The chiller plant also includes an integrated waterside economizer to serve the data center and computer labs.
Contractors	Webcor Builders (GC), ACCO (HVAC)
Taylor Engineering's Role:	Full design and commissioning for HVAC, controls, plumbing and fire protection.
